Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claim 6 is objected to because of the following informalities: the word "Shaped" should not be capitalized. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Low (US 4,446,749). Low discloses the claimed arrangement for a plankton net, including net compartment enclosed by sieving member [54], member [12,56] which keeps the compartment entrance closed until sampling is to be conducted, and member [58] arranged to enclose a collected amount of water, where the member 12 is connected by hinge members [20a,22a], and each closing member is arranged to be tripped remotely; the member [12] is biased in a closed position by a biasing member. See entire disclosure, especially Figures 5 and 6a-d, and explanatory text.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Low (US 4,446,749) in view of Bourret (US 4,224,755). Low teaches the claimed invention, including a collection cup which is necessarily detachable, except for the net compartment being box-shaped. Bourret teaches a box shape for a plankton net; see Figure 1. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a box shape as taught by Bourret in the invention taught by Low to form the shape of the net, since Bourret teaches that the shape is advantageously used for collecting plankton.

Allowable Subject Matter

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, since the prior art neither discloses nor fairly teaches the inward opening lid of claim 4 in combination with the other positively recited features.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
